

# PREMIUM SUPERYACHT HULL PROTECTION

## ANTIFOULING

# MegaImperial®

MegaImperial antifouling is specially designed for Superyachts which have the challenge of relatively low sailing activity. The proven long lasting protection is provided by advanced silyl technology, ensuring a linear polishing rate and a low leached layer – providing a continual, controlled release of biocides over the time.

## MegaImperial® | MegaImperial® | XTR\*

- Advanced silyl technology
- Up to 36 month performance guarantee
- Can be applied over most other antifouling technologies

**Kit Size:** | 5 & 20 ltr

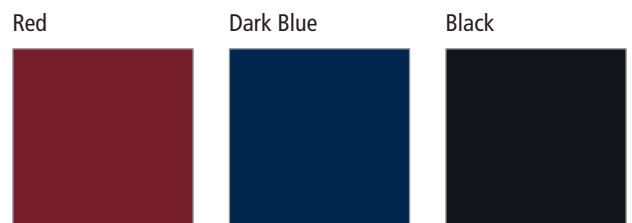

\* Imperial XTR has federal EPA approval for application in the USA.  
Non-approved paint can be applied to a vessel abroad, and the vessel can subsequently trade in USA waters.

Due to the limitations of colour printing processes these colours are an indication only and may deviate slightly from the delivered product.

# MegaRoyal®

Royal antifouling is a self-polishing antifouling based on an ion exchange copolymer binder. Designed for use on large sailing and motor yachts operating globally with service periods up to 24 months.

Due to the limitations of colour printing processes these colours are an indication only and may deviate slightly from the delivered product.

- Reliable performance
- Available in 3 colours
- Up to 24 month performance guarantee

**Kit Size:** | 5 & 20 ltr

## PREMIUM HULL PROTECTION – Exterior & Interior

Jotun has built a reputation for quality products that deliver exceptional performance and is widely recognized as the marine industry’s leader in antifouling technology, offering specialist silyl acrylate technology to superyachts with MegaImperial®.

Jotun is trusted for the protection and aesthetics of some of the world’s most prestigious and iconic yachts. Protection starts at the hull substrate: with full corrosion protection (externally and internally), the latest antifouling, interior and tank coatings, offering longevity and the highest return of investment.

Jotun offers a range of product performance, certification and warranty packages, including 5 year extended guarantees, when using a specific Jotun underwater coating system in conjunction with Cathelco Impressed Current Cathodic Protection (ICCP) 

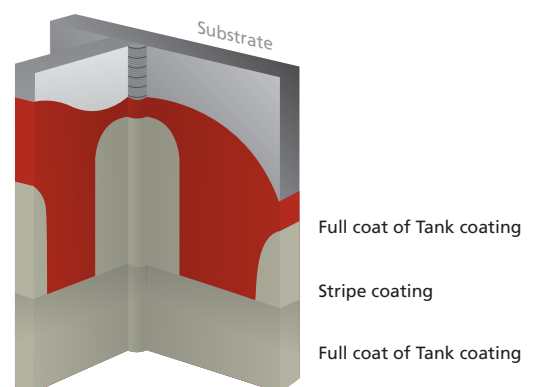

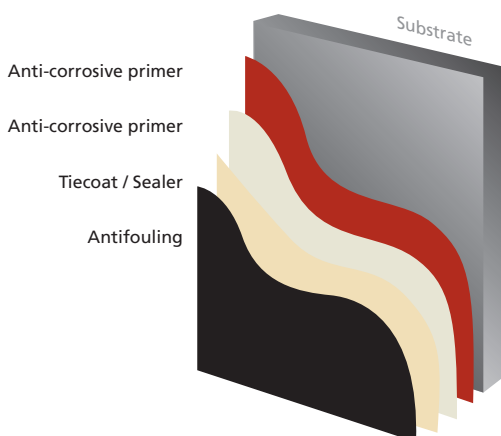

Jotun offers technical support with dedicated yachting FROSIO or NACE certified coating advisors, all with extensive specialist knowledge and experience, to ensure best practice and correct surface preparation, environmental conditions and application – all essential to achieve long-term performance.

### Exterior

### Interior

## ANTI-CORROSIVE PRIMER

# MegaCote™

5 YEAR  
GUARANTEE

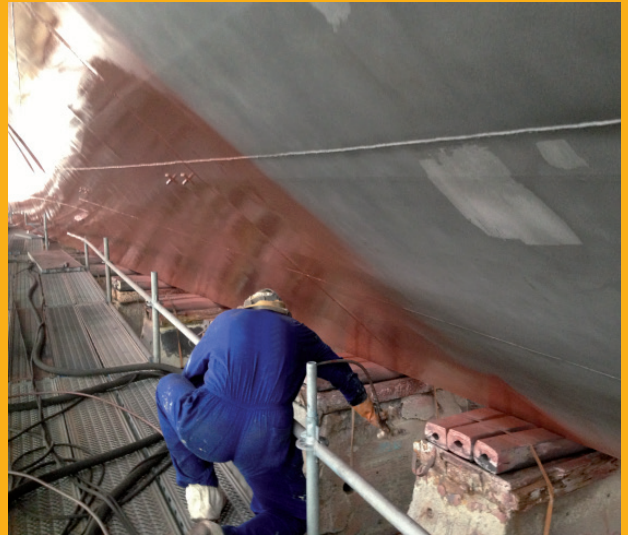

A universal epoxy primer for use on all yacht substrates and areas – internal, external, above and below water, and applied at any time of the year.

### CERTIFICATION

- PSPC/IACS ballast tank coating requirements
- Germanischer Lloyd certified for corrosion control on water immersed areas of ships
- Certified low flame spread coating system for yacht interiors, tested and approved for surface flammability and smoke toxicity according to IMO, MCA and USCG requirements

Kit Size:

4 & 18 ltr

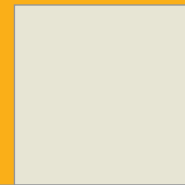

### EXTENDED GUARANTEES AVAILABLE

When using a full Jotun underwater coating system in conjunction with Cathelco Impressed Current Cathodic Protection (ICCP) 

Aluminium Red

White

Due to the limitations of colour printing processes these colours are an indication only and may deviate slightly from the delivered product.

## TIE-COAT/SEALER

# MegaSealer®

A high build, epoxy-vinyl tie-coat/sealer with added anti-corrosion protection. Recommended as a tie-coat between an epoxy coating and antifouling, or can be used as a sealer coat on old and existing antifouling systems.

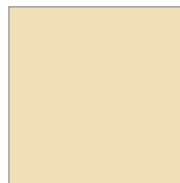

Kit Size:

4.5 & 18 ltr

Megasealer is compliant with IMO Antifouling System Convention AFS/CONF/26.

Buff

Due to the limitations of colour printing processes these colours are an indication only and may deviate slightly from the delivered product.

## TANK COATINGS: FRESH WATER

# Tankguard DW

A solvent free epoxy tank coating designed and certified for potable water tanks.

### CERTIFICATION

Approved for drinking water according to BS 6920 and by the Norwegian Institute for Public Health.

White

Light Grey

Due to the limitations of colour printing processes these colours are an indication only and may deviate slightly from the delivered product.

Kit Size: 15 ltr

## TANK COATINGS: BLACK & GREY WATER

# Tankguard Special Ultra

A phenolic epoxy tank coating with superior chemical resistance and good levelling properties leaving a smooth surface for easy cleaning.

Light Grey

Light Red

Due to the limitations of colour printing processes these colours are an indication only and may deviate slightly from the delivered product.

Kit Size: 20 ltr
