

Mattress Guide & Specifications

When ordering new Bed Linens or Mattresses there are a few things to consider. Never say these beds are “standard sized”, sizes change from country to country and very few yacht beds qualify as standard. Always measure each bed and take a photo of any curved corners of non rectangular shapes. Here is how to measure a bed:

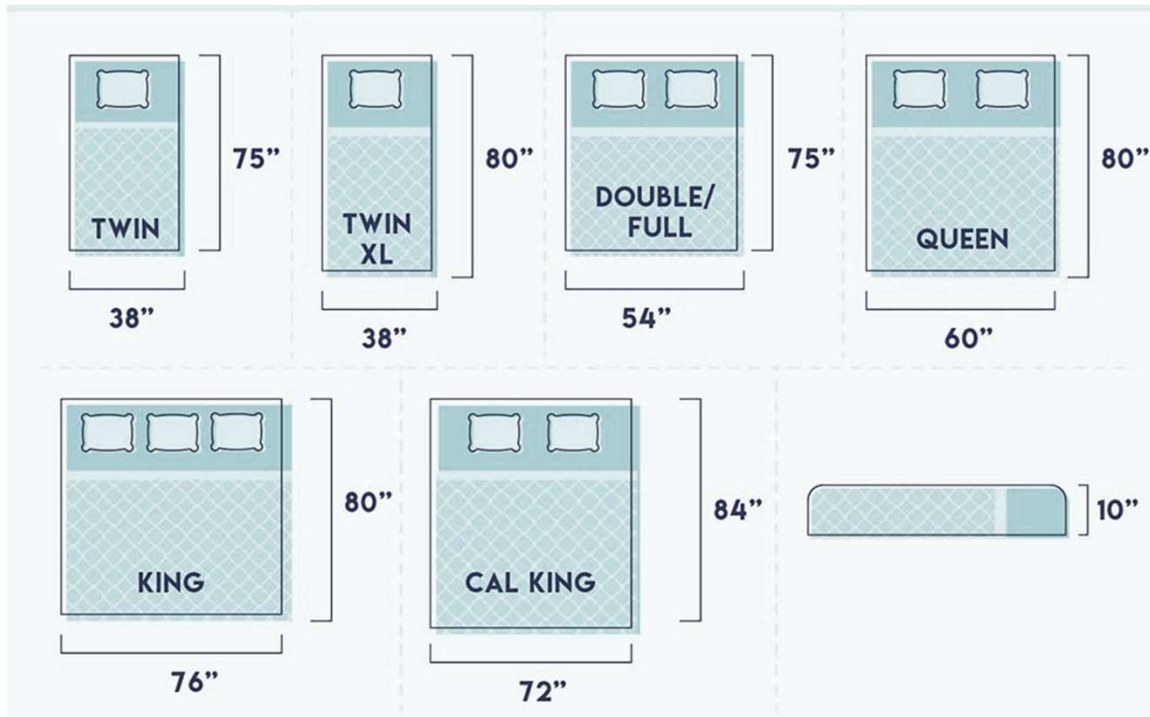

1. Head of bed width
2. Foot of bed width
3. Length of bed
4. Diagonal measurement
5. Diagonal measurement
6. Mattress height

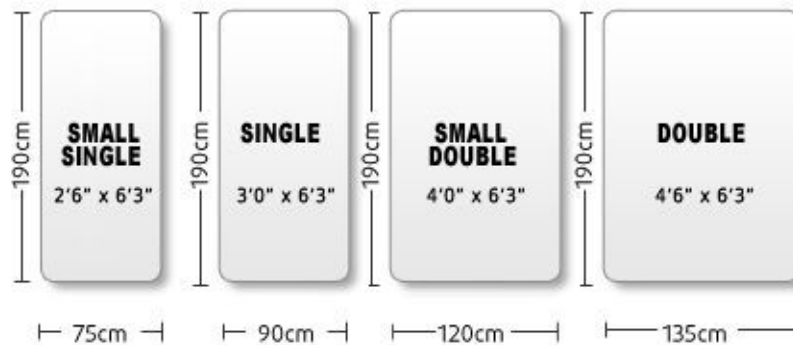

Even with these measurements it might be necessary for us to have templates made.
